January President’s Message

Happy New Year! Starting a new year is always filled with wide-eyed optimism in setting personal goals, seeking new opportunities, or simply recommitting one’s self to an existing interest. At SFUPS, we’ve chosen to do all these things with a very active year ahead. We gave a 2015 sneak-peek at our December holiday party with big ideas and aspirations. There’s no doubt our cast of 2014 presenters made it clear that we were serious about your learning and excellence in underwater photography. We have every intention of revving things up and starting the year off with a BANG!

Chris “Gug” has returned as our January presenter, and will highlight numerous examples of “epic fails” when it comes to common post-processing mistakes that even the pros make. Sometimes the best learning is not in teaching how to do something but in highlighting “what not to do.” Phil Rudin will also begin a new monthly segment along with experts at Reef Photo and Pompano Dive Center called our “Ask the Experts” series. Many of you have questions specific to your gear, photo techniques, post-processing, and even printing or aspect ratio inquiries that may not be addressed in a group setting. We will develop an opportunity for you to meet with an expert with your gear or laptop before every meeting enabling you with one-on-one instruction. Live Tech Support at your service!

Naturally, conservation will be on our minds in 2015 as Angela Smith helps to unify our voices coupled with your imagery in matters concerning the oceanic world. Locally we have our own challenges. You’ll begin to hear more throughout the year about our first annual International Goliath Grouper photo competition attracting guests worldwide to help solidify their protected status through underwater photography. Additionally, you’ll get a chance to create connections to position your imagery with great periodicals like X-Ray Magazine who are developing long-lasting partnerships with SFUPS.

Each meeting this coming year will give you an opportunity to acquaint yourself with new photo opportunities, dive buddies, and to meet new and old generations of photographers. There are a myriad of top professional featured speakers that will be visiting the organization. So, let’s get excited, throw caution to the wind, and renew your membership. Linda Ianniello and Susan Mears have made it easy for you to renew online. Click the “Renew Membership” button below and get ready for a year of adventure.

I am happy to announce that the SFUPS member exhibit “Our Oceans: In Perspective” will open on January 14th in conjunction with Nova Southeastern University Oceanographic Center’s DIVE IN lecture series.

SFUPS members’ beautiful photos of coral reefs and charismatic ocean animals from Florida and worldwide locations will be on display at the fourth floor of the Oceanographic Center and will hang for six months.

The event also brings coral reef science and conservation to the Southeast Florida community. Mark Eakin, Ph.D. National Oceanic and Atmospheric Administration’s (NOAA) NEDSIS Center for Satellite Applications and Research, NOAA Coral Reef Watch Coordinator will be speaking that evening with a lecture titled, “Hot Sour Soup: How Warming and Acidification of the Ocean is Killing our Coral Reefs.”

In addition to the larger SFUPS exhibit area on the fourth floor that will be open for viewing, directors at Nova Oceanographic Center will also select a few SFUPS member photos from the exhibit to place on easels near the auditorium that night. The selections will reflect the subject matter for the first DIVE IN series lecture - coral reefs.

The event starts at 6:00pm on the third floor of the Oceanographic Center near the auditorium. There will also be light refreshments after the evening’s lecture.
SFUPS Events and Programs continued

Angela Smith

SFUPS “Our Oceans: In Perspective” Exhibit at Nova Southeastern University
Oceanographic Center

The Oceanographic Center is located at 8000 North Ocean Drive, Dania Beach and is sponsored by Nova Southeastern University, Mote Marine Laboratory’s Protect Our Reefs Grants Program. The reception will be sponsored by Divers Direct.

I hope to see you all at this wonderful community gathering and SFUPS exhibit opening. We are thrilled that Nova Southeastern University will be hosting our photography within the prestigious Guy Harvey Oceanographic Center!

Pompano Dive Center to host Lionfish Education Workshop on January 11

Ana Zangroniz, a volunteer with Biscayne National Park will be giving a "Lionfish Education Workshop" at 10:00am on January 11th, 2015 at Pompano Dive Center. The workshop will be followed by 2 reef dives where we put that knowledge to work to eradicate some Lionfish! Cost for the Workshop is Free.

The optional Two Tank dive Charter that will follow is the normal rate of $65. Please call 954-788-0208 to book a spot for the dive and/or seminar.

The Workshop will include information on history and status of the lionfish in the Western Atlantic and Caribbean, Lionfish biology, impacts of invasion on the local ecosystems as well as humans. Special emphasis will be on safe diving, collection, and handling practices with a demonstration of safe venomous spine removal. Ana will also perform a dissection so that we may see what the lionfish has eaten recently.

The Lionfish Rescue and Education Foundation (lionfishrescue.org) will also be in attendance to answer additional questions, and to let you know how you can have a positive impact on our local ocean!
Phil began taking photographs underwater while he was in the U.S. Navy. Phil is a regular contributor to Underwater Photography Magazine (USPMAG.COM) and a freelance writer/travel photographer. As seven time past President and Underwater Photographer of the Year for the South Florida Underwater Photographic Society, has served on the Board of Directors for over twenty years. Phil enjoys the diverse makeup of the photo club’s over 150 members and the environmental and conservation involvement of the club.

Phil retired from the West Palm Beach Florida Police Department where he served as Dive Team Commander for the city. With thirty years of experience as a public safety diver and dive team manager, Phil did over five hundred recovery dives during his career. Phil has recovered vehicles, aircraft, evidence, bodies and more. Other dive team duties included hull inspections of large commercial vessels, underwater crime scene management, crime scene photography, collection of evidence, training and budget management.

Phil has also traveled extensively throughout the world to peruse his passion for underwater photography. His images have appeared in magazines such as Popular Science, Underwater Photography Magazine, Reflections, Rodale’s Scuba Diving, Underwater Journal, Skin Diver, Florida Underwater, South Florida Adventures, The Sun, Dive Chronicles, Waterways and more. Phil also teaches underwater photography classes for Reef Photo Video, Hasselblad Xcursion’s, Mexican Diver Magazine and others. Phil lectures on travel destinations and photography around the country. Phil celebrated fifty-one years as a certified scuba dive in February 2014.

View Phil’s video gallery here
I have had a passion for the water and photography for as long as I can remember. From one of my uncles throwing me in the pool to teach me how to swim, to kayaking with my father and uncles for some R&R. From there everything went inverted. I started shooting lionfish and moved to a GoPro making video! I would go diving and admire all of those big and fancy cameras. Watching their footage made me hooked. I then picked up my Sony NEX-7 in March of 2014 and started shooting everything that I could. Honestly, in the very first shots, I was very disappointed with my underwater pictures. But patience and time pays off. I would go and shoot and talk to all of my friends. Lee told me, “Knowledge is free brother, I will help you learn the fundamentals”, and we’ve been friends ever since. He then introduced me to SFUPS! From then on I have been shooting video and pictures throughout the world. I use Final Cut Pro X to edit the video while I also use Logic Pro X to compile and comprise the music. This brings even more of my feelings to the screen. The sound is dependent on my mood, and some of the songs I don’t think will ever be complete. Thanks for watching my videos! Happy Shooting!!

January Guest Speaker
Chris Gug

Chris Gug, or just Gug (pronounced “Goog”) for short, is a Fort Lauderdale-based full-time professional underwater photographer. For more than 15 years, he has been exhibiting in some of the most prestigious galleries and museums around the world, but in 2012, opened the Gug Underwater Gallery in Fort Lauderdale, FL to showcase his love of viewing the sea as fine art for the home, office or public display. He is regularly published in numerous magazines and teaches underwater photographic techniques both locally and around the world.

As a proud member and sponsor of the club, Gug also teaches regular mini-seminars at monthly SFUPS meetings and is an authorized dealer and consultant for Aquatica, Ikelite, Amphibico and more. He is a techno-geek and loves pushing the limits of camera and computer equipment, and although all the images in his gallery are unmanipulated (aside from a raw conversion), he is always staying abreast of (and creating) the coolest trends in still & video post-production.
Club Members in the News

- Suzan Meldonian was featured in UnderwaterPhotography.com’s weekly hotshot status for the week 51: December 28, 2014. See her image here:
  
  http://www.underwaterphotography.com/blog/weekly-underwater-hot-shot-week-51-suzan-meldonian/#.VKNDjIrF-II

- Anne Dupont spoke at Loxahatchee River Center in Jupiter, FL on December 5, 2014. Anne’s talk, and underwater photography lecture entitled “Marine life found in Lake Worth Lagoon” was well received by approximately 100 people.

- Bernd Meir was featured in the December 2014 issue of “Sport Diving” Magazine for reporting a rare find in the Philippines. Bernd photographed an octocoral tentatively identified as Efflatounaria, which looks quite similar to a nudibranch.

- Walt Stearns’ article on wide-angle photography ("Getting the Big Picture") was featured in the January/February 2015 issue of “Depth Magazine.”

2015 SFUPS Contest Categories

https://sfups.org/2015-contest-subjects/

*January submissions due by January 11

January MASTERS-
The Little Creatures” Suggested are well-composed animals less than one inch in life size: skeleton shrimp, amphipods, uw lady-bugs, hairy shrimp, some tiny little live shells. We want to see the eyes of the creature in focus. *No nudibranchs or sea slugs for this one.* (Super macro)

January CHALLENGERS
“Reflections” Looking for any marine animal close to the surface where its reflection is recognizable and clear. (any lens)

- For Sale: Seacam housing body for Nikon D700 D-SLR. This housing has been modified to allow the user significantly better access to the capabilities of the Nikon D-700. These modifications include a triple function control that provides use of both the preview and function buttons on the front of the D700 body and provides a port lock, none of which capabilities normal Seacam housings have. Additionally there is a clutch mechanism which automatically engages or disengages a manual focus gear when you switch the normal M-S-C control between Manual and the two auto-focus modes. I also have non-Seacam handgrips on this housing, attached to the front half of the housing. Included with the housing body is a Nikon D700 camera body with two camera batteries, two battery chargers and other bits. Price for the housing is $4500.
  Also available is a Seacam 45-degree viewfinder which is $850 if purchased separately, or $500 if purchased with the housing body.
  I also have a wide port (6" glass dome port) and some extension tubes and some lens gears available. Contact Fred Bavendam fbavendam@hotmail.com or a telephone 941-953-7623

- Nikon D7000 body in excellent condition (includes 2 batteries and GGS protective glass on rear display) $700, Nikon 105mm f/2.8 VR macro (includes $70 Hoya HD UV 62mm filter) $900 OBO, Nikon 70-200mm f/2.8 VRII (includes $75 Hoya HD UV 77mm filter) $2,100 OBO. These lenses are barely used and like new. Contact Steve Velazquez @ stevev23@gmail.com
